Greta Laundry Art

Greta's vibrantly coloured paintings and drawings are joyful celebrations of the natural environment in which she was raised (on farms in regional South Australia), and continues to love visiting from her home base of Adelaide, SA. inspiration comes in many forms from the memories of her 1970/80s childhood, mid-century Modern design artefacts, through to the undulating landscapes of her home state.

Greta's paintings are loved for her use of colour, shape and space to create works which are strong, individual, yet very balanced. Balance is an essential component in Greta's work and life and she recognises this as a commonly shared part of our humanity.

Subconscious processes form the backbone of her studio practice, with an emphasis on 'play' as a valuable tool to experiment and discover new journeys with her work, and this often involves cutting up old paintings, trying new media, sketching and collaging.

Greta has exhibited extensively throughout Australia since graduating with a Bachelor of Visual Arts (1st Honours) in 2009. Her work is in numerous private collections throughout Australia, Canada, USA, Spain, Germany and Ireland. She lives in the lovely foothills of Adelaide, with her husband, two young adult children, three chickens, two cats and her favourite pet, her Aussie Shepard, Asha.
