

EDWINA STANHAM

Edwina Stanham works in acrylic and mixed media to create an imagined landscape and its human and animal inhabitants.

Drawing on her innate connection with animals, Edwina uses this to explore the bond between animals and humans. Her lyrical paintings celebrate the joy of this human/ animal connection.

After having studied at NAS in the 80's, Edwina has focused more on her art in the past 10 years, exhibiting in Bowral and most recently in Sydney.

She works from her studio in her garden at Camden, often in the company of her dogs and chooks.
